

Ease

Topical Analgesic Spray

Code: 134

Package Size: 4 ounce bottle

Suggested Use: Apply several sprays to painful area liberally. Massage until dry. Repeat application immediately one or two times.

Superior Pain Relief In Minutes From a Revolutionary Topical Pain Reliever

Do you suffer with aches and pains from headaches, sports injuries, low back discomfort, arthritis, rheumatism, bursitis, or joint pain? These, and many other kinds of pain and discomfort can now safely be treated with a REVOLUTIONARY, TOPICAL PAIN RELIEVER called EASE.

Everyone knows there are many other products on the market that will relieve pain. The big problem with them is they have to be taken orally, which means they work through the digestive system and the blood stream, entering organs and tissues of the body. For many people, this leads to stomach or intestinal distress.

Before EASE, the adverse side effects from internal pain relievers were something you simply had to accept - there was no effective alternative. However, with EASE we now have an alternative for the treatment of pain. No longer do you have to swallow a pain reliever, putting medicine into your stomach, kidneys, heart, and liver just to get relief. EASE is healthier and safer because only a minuscule amount enters the blood stream or organs of the body. This revolutionary, but simple idea is what EASE is all about. There have been no reported adverse side effects!

EASE is a liquefied, topical analgesic to be applied wherever pain occurs. The main ingredient is a proven salicylate. EASE effectively combines the analgesic power of aspirin with the humectant properties of Emu Oil and Aloe Vera, and MSM (Methylsulfonylmethane) to produce pain killing and anti-inflammatory action superior to any other external product.

Many people say it is not possible to get true relief from an external product. They say true pain relievers - analgesics - must be swallowed to be effective. Until now they were right, because all the other external pain relievers on the market did not do much except "disguise the pain" by warming or cooling the area where applied.

In addition to the severe pain and discomfort of broken bones, shingles, burns, migraine headaches and the like, EASE is great for those discomforts people experience from sunburn, insect bites, and strained muscles, just to name a few. If used right away on sunburns, the skin will not peel. No massage is necessary and remember the key - use very liberally.

Practical applications EASE users have experienced in relieving pain and reducing inflammation:

Arthritis	Leg Cramps
Animal Bites	Migraines
Acne	Nail Pain
Back Pain	Neck Pain
Burns	Osteoarthritis
Black Eyes	Poison Ivy
Boils	Poison Oak
Blisters	Rashes
Bed Sores	Sun Burns
Bursitis	Scrapes
Bunions	Sports Injuries
Bruises	Shingles
Cuts	Sciatica Pain
Cyst	Shaving Cuts
Decongestant	Tired Feet
Foot Blisters	Tendinitis
Foot Aches	Tension Headache
Fractures	Tick Removal
Flat Feet	Thigh Friction
First Aid	Welts
Herpes	Tooth Aches
Fused Ankles	<i>(apply with a cotton swab or finger)</i>
Hip Discomfort	Canker Sores
Hives	<i>(apply in or out of mouth with a cotton swab or finger)</i>
Insect Bites	
Joint Pain	
Knee Pain	

After applying EASE you should begin to experience almost immediate relief, and its analgesic and anti-inflammatory action normally lasts at least six hours, often longer. In addition, when used daily, EASE often has a powerful cumulative effect, allowing many people to use less EASE, less often, for continued pain relief. We recommend the painful area be dosed liberally, then gently massaged. This procedure should be repeated two or three times, depending on the severity of the pain.

Best of all, since you do not ingest it, EASE has none of the side effects associated with aspirin and other pain relievers that are taken orally.

New and wonderful uses for EASE are being discovered each and every day! It can also be used on animals. Animals sometimes have the same problems with pain as we do. Keep a bottle in your office, home, and car at all times. The compact spray bottle fits easily in purses and briefcases. Be sure to use EASE on your children for those cuts, scrapes, and bruises.

Ease Testimonies . . .

We've Found Sweet Relief!!!

With just two sprays on my hip the intense pain deep within the hip joint was entirely relieved and it did not return! When pain from an old injury flared up in my neck, I applied the analgesic spray and within a few minutes the pain was entirely relieved! We've also applied it to our aching hands, feet, legs, back, etc., and found sweet relief!

Mardella L. Mitchell

I Got Rapid Relief!!!

I got rapid relief of pain in the lumbar area which was due to overworking, strain, and stress. I have found it to be effective immediately each time that I have used it.

M. Jeannette Korinek

So Much Relief!!!

I have now given your product a very exhaustive testing and I am absolutely delighted to report that it has given me so much relief that I have been able to half the morphine that I need to get through each day. This in turn has had the added secondary benefit of giving my stomach substantial relief, and for the first time in six months, my specialist has agreed surgery will not now be required to rectify the severe stomach ulcers that were caused by the medication. All internal bleeding has stopped and I am almost completely pain free from the stomach. It has made a substantial improvement to my general health. Thanks. Please send me six bottles.

David, Australia

It Works!!!!

It works!!!! Many thanks to all for your product. I have facial neuralgia. I haven't had to use Tegratol to control it since I tried your topical analgesic spray. I will highly recommend it!

Peter A. Smith

The Results Are Unbelievable!!!

I am 48 years old and suffer from osteoarthritis in both knees and in my lower back. The pain was so bad that Tylenol was not helping and the doctors had me on Delauded, which is a morphine derivative. This product has saved me from becoming addicted to my medication. I haven't taken Tylenol or Delauded in a month. The results are unbelievable.

Estelle Blats

The Results Are Most Impressive!!!

I have been using your topical analgesic spray in my various clinics for the past three weeks, and have treated numerous painful conditions ranging from disc degeneration to muscular strains. The results have been most impressive and my patients' response to the treatment is very satisfactory. This is an outstanding product and will be an integral part of my treatment of most painful conditions in my practice.

James. H. S. Black, M.D.

Reduced My Pain To Zero!!!

I sprayed the analgesic spray on my lower back and pain from strain and muscle spasms reduced to zero, so I could sleep all night.

Jeanette Korinik

No Side Effects!!!

I spray the areas and feel instant relief from discomfort due to work, exercise and movement in my back and knees. I am allergic to aspirin, but have had no side effects with your topical analgesic spray.

Loma J. Yokotake

Eliminated My Pain!!!

This product reduced the neck pain so I could go to sleep faster. And, eliminated pain in my finger that is swollen with arthritis.

Dorothy M. Moudy

Thanks So Much!!!

I continue to be personally blessed by your product and have found my chronic pain level to be decreased dramatically. On top of that I am nearly off all prescription drugs. I am handling my condition with the spray and Tylenol! What a difference! Thanks so much.

Saundra Gardner

Unique consumer product!!!

As a product development chemist for over twenty years, specializing in the development of topical human drugs and other personal care products, I can attest to the unique efficacy and safety of your topical analgesic spray. Muscular aches and pains are relieved in moments after application, while posing no safety hazard to the user. I believe this to be one of the more unique consumer products to come along in years.
